

Health Screening Questionnaire

A Health Screening questionnaire must be completed by each individual prior to participation in each on-ice or off-ice club/skating school activity. This includes participation in sessions on rented ice outside of a club/skating school setting.

Skate Ontario requires the use of the following screening tools for clubs and skating schools within all colour zones of the COVID-19 Response Framework using the tools below:

- School-aged children may be screened using the Ontario COVID-19 school and child care screening tool

Online Version: <https://covid-19.ontario.ca/school-screening/>

PDF Printable Version: [Ontario COVID-19 school and child care screening - PDF](#)

- All other individuals may be screened using the Ontario COVID-19 customer screening tool

Online Version: <https://covid-19.ontario.ca/screening/customer/>

Please note:

These questionnaires may be completed verbally. Parents may complete the screening on behalf of a child.

Health screenings are only valid for the day they are completed.

If clubs and skating schools have established other mechanisms of completing Health Screening for their members, these may continue provided that the content is consistent with the Ontario Ministry tools linked above.

All individuals must successfully pass the health screening in order to participate in club or skating school activities. School aged children may use the result from their in-school screening provided their health situation has not changed throughout the day.
