

How to Correctly Submit Element Codes for PPC (Planned Program Content) Submission

When submitting your PPC's, either online or a paper submission, it's important to use element codes only. You should not enter any words, either on their own or in combination with the element codes. Please see the below chart for what is acceptable for PPC submissions:

EXAMPLE OF ENTERED PPC	CORRECT OR INCORRECT
2A – Double Axel	✗
Change Combo Spin	✗
2Lo	✓
StSq	✓
CCoSp	✓

These codes are transferred directly to the judges' worksheets. There is only room for codes; the judges & tech panel are aware of what the codes represent and do not require further explanation.

Here is an example of the judges' worksheet:

	Planned Element	Executed Element
1	2A	
2	CCoSp	
3	3S
